2nd September 2021: Everrati Automotive Limited (Everrati™), a leading technology company specialising in the redefining and futureproofing of automotive icons through the integration of the very latest electric vehicle (EV) powertrains, is debuting its new Porsche Gulf Signature Edition, an electric supercar based upon a fully restored Porsche 911 (964), at Salon Privé Concours d'Elégance.

Showcasing some of the automotive industry's most exclusive and desirable creations, the Salon Privé Concours d'Elégance is renowned for its spectacular setting at Blenheim Palace, deep in the heart of the Oxfordshire countryside. The idyllic venue brings together automobiles from all eras, from vintage classics to modern supercars and racing legends. This year, Everrati is taking pride in displaying the Gulf Signature Edition for the first time to the public, alongside its electrified version of the legendary GT40, created in partnership with Superformance.

Featuring carbon fibre body elements and a state-of-the-art EV powertrain, the Porsche Gulf Signature Edition can deliver an emission-free driving range of more than 180 miles and sub-4-second 0-62mph acceleration. The EV powertrain, which has its power delivery optimised specifically

for the Gulf Signature Edition, is coupled to a 53kWh battery pack and advanced battery management system.

Sending 500bhp to the rear wheels, the new Porsche Gulf Signature Edition has more than double the power output of an original 1990's Porsche 964. With 500Nm delivered instantly, the car can accelerate to 62mph in less than four seconds. This blistering acceleration is accompanied by a 180-mile range, dependant on driving style.

As part of Everrati's partnership with Gulf International, the Porsche Gulf Signature Edition is instantly identifiable by its timeless Gulf orange and blue race car livery as easily one of the most respected and celebrated colour schemes in all of motorsport.

A globally recognised and trusted brand, Gulf, traditionally known as a downstream oil company, is synonymous around the world with high-quality products, innovation and technical excellence, but is now actively moving into the e-mobility/electric vehicles sector aligning directly with Everrati's attributes.

Justin Lunny, Founder & CEO of Everrati Automotive Limited said: *"Everrati redefines some of the world's most iconic cars enabling them to be driven and enjoyed with a clean future. We are proud to showcase the first of our Gulf-liveried creations based upon an electrified and redefined Porsche 911 (964) at Salon Privé, alongside some true legends of the industry. The combination of Gulf's stunning blue and orange livery and our state-of-the-art EV powertrain makes our Signature Edition a truly exceptional zero-emission supercar."*

About Everrati™

Everrati™ was founded in 2019 by British entrepreneur Justin Lunny and long-term automotive specialist Nick Williams. Both car enthusiasts from an early age, they became increasingly conscious of the wider impact combustion engines have on the environment. Everrati was launched with the vision of restoring iconic models from an earlier era and converting them to electric propulsion. Everrati's model line-up consists of electric versions of the Porsche 911 (964) Coupe and Targa models, 911 (964) Gulf Signature Edition, Land Rover Series IIA, Mercedes-Benz SL Pagoda and GT40. Everrati™ designs, develops and builds its cars from a bespoke facility in Upper Heyford, Oxfordshire.
