**Thursday 9th September 2021:** Everrati Automotive Limited (Everrati™), the leading technology company specialising in the redefining and futureproofing of automotive icons through the integration of the very latest electric vehicle (EV) powertrains, has been inundated with enquires following recent high-profile displays of its product ranges at both Salon Privé and Concours of Elegance.

Following this and in celebration of World EV Day, Everrati is delighted to announce that order books are open for commissions of all models in its 911 (964) range, the GT40 created in partnership with Superformance, and the Series IIA Land Rover model.

Everrati's product portfolio has garnered extensive international interest and acclaim, as the company's revolutionary technologies and expertise are applied to some of the world's most celebrated cars.

Today, via Everrati's website, a build-slot can be secured on all models with a deposit of £1,000. Each bespoke commission is designed, developed, and manufactured at Everrati's global headquarters in Upper Heyford, Oxfordshire, England, by an elite team of experts from across the automotive, aerospace and technology sectors.

Customers can experiment and personalise their own 964, GT40 and Series IIA commissions through [Everrati's new online configurator](https://cc.everrati.com), using a range of exterior paint colours, liveries and alloy wheel finishes, and place their deposit online today via: <https://www.everrati.com/waitinglist/>

**Everrati CEO, Justin Lunny, said:** *“We are delighted to open our order books for the wide range of our electrified products. It has always been Everrati’s vision and mission to offer the most sought-after, expertly manufactured, sustainable, technically advanced and zero-emission cars – and since we announced our new models, interest from all over the world has been tremendous. Every Everrati build is fully bespoke and we’re excited to work with customers, bringing their unique EV dream car to life.”*

## **911 (964) models**

First introduced to the world in 1964, the 911 has since solidified its place in automotive history as the most iconic sports car of all time with its revolutionary design and supreme performance engineering. The 964 generation was first brought to market in 1989 in Coupe, Targa and Cabriolet specifications. Today, Everrati’s interpretation of this timeless classic sees the car restored to the highest level and fitted with a state-of-the-art battery pack capable of emission-free driving.

Maintaining the structural integrity of the original, Everrati’s offers the 964 in Coupe, Targa and Cabriolet configurations, with the option to fully reverse the EV conversion process if desired. A 53kWh battery pack with a range of over 180 miles produces 440bhp and 460Nm of torque, accelerating the car to 60mph in just 4.5 seconds. Prices for each commission begin at £200,000 plus relevant taxes, based on a customer-supplied donor car.

Revealed in May 2021, Everrati’s ‘Signature’ wide body version of the 964 features carbon fibre bodywork elements and is able to achieve sub-4-second 0-60mph performance in conjunction with the optional Performance Pack. 500bhp and 550Nm are sent directly to the rear wheels for instantaneous performance, with almost identical weight distribution maintaining and enhancing the soul of the original. Prices for each commission begin at £250,000 plus relevant taxes, based on a customer-supplied donor car.

With a shared passion for clean technology in partnership with Gulf, Everrati is accepting orders for the 911 (964) Gulf Signature Edition, decorated with the renowned Gulf orange and blue race car livery. Gulf’s strong brand presence stems back to the glory days of motorsports and their infamous racing colours will now grace future Everrati models of the customers’ choosing. A number of options are available including hand-painted livery.

## **GT40**

One of the automotive world’s most recognisable and distinctive designs, on road and on track. Now in the expert hands of Everrati and Superformance, this electrified version of the legendary GT40 has been comprehensively adapted from ICE power to advanced electric propulsion.

With an astonishing 800BHP (peak) and 800Nm and utilising a 700v system voltage, the GT40 demonstrates Everrati’s superiority in EV drivetrain technologies.

Meticulous attention to detail is being applied to key factors such as battery location and weight distribution to maintain and enhance the character and soul of the original. Further details on this first new model from the partnership and reimagined icon will be announced in the coming months, yet deposits can now be placed to secure build slots.

## **Series IIA Land Rover**

Renowned as one of the most iconic off-road vehicles since its launch over 60 years ago, the Series IIA Land Rover is an unmistakable British legend. Restored to the highest level, Everrati has now redefined this undisputed icon from a 1960’s utilitarian vehicle into a beautiful, zero-emissions vehicle, suitable for the 21<sup>st</sup> century.

Housing Evertati's state-of-the-art electric powertrain, the Series IIA is has a zero-emission range of over 100 miles, combined with AC and DC fast charging capability. The car's 60kWh battery produces 150bhp and 300Nm in both two-wheel drive and four-wheel drive modes.

Prices for each commission begin at £150,000 plus relevant taxes, based on a customer-supplied donor car.

### About Evertati™

Evertati™ – Evertati™ was founded in 2019 by fintech entrepreneur Justin Lunny, and long-term automotive specialist Nick Williams.

Both car enthusiasts from an early age, they became increasingly conscious of the wider impact combustion engines have on the environment.

Evertati was formed to redefine some of the world's most iconic and performance cars enabling them to be used in a clean air, low-carbon world.

Today, Evertati™ offers its customers the ability to commission their own electric Mercedes-Benz SL W113 Pagoda, Porsche 911 (964) Coupe, Targa and Convertible including Limited Edition models such as the officially licenced Gulf Signature Edition, and Land Rover Series IIA in a range of configurations.

Evertati™ designs, engineers and develops electric cars from a bespoke facility in Upper Heyford, Oxfordshire.
