The Hamptons, New York. 12 September 2024: Everrati, creator of the world's most iconic, sustainable luxury electric cars, redefined and futureproofed with cutting-edge zero emission powertrains, will make its premier appearance at The Bridge in The Hamptons this week, showcase its latest car, a bespoke Porsche 964 RSR homage.

Referred to as the Evergreen Commission, the redefined zero emission supercar is Everrati's most driver-focused Porsche model to date and exemplifies the company's mission to futureproof automotive icons, enabling them to be enjoyed by the next generation. It will be on display at The Bridge in The Hamptons, one of the world's leading events celebrating the art and design of luxury cars. Attendees will be able to witness Everrati's commitment to blending iconic design with sustainable innovation, a mission that resonates with collectors and enthusiasts alike.

Drawing inspiration from the 1993 964 RSR—a race-ready, lightweight, turbo wide-body competition car, the Evergreen Commission is a zero-emission homage to a true racing legend. Just 51 examples of the original 964 RSR 3.8 were made, making this tribute a rare and highly sought-after piece of automotive craftsmanship.

Everrati Founder and CEO, Justin Lunny, commented: *"We are thrilled to be part of The Bridge for the first time and to showcase the Evergreen Commission. It epitomises Everrati's mission to combine the beauty of classic automotive design with future-proofed electric technology. This vehicle is a prime example of Everrati's expertise in transforming iconic models into sustainable works of art and embodies our ethos of preserving the spirit of iconic vehicles."*

"One theme continues to dominate from all the conversations we have with enthusiasts no matter what their age: the unabashed enthusiasm for sustainable, electrically powered luxury and performance cars. All our models, whether they are in-house developed or the result of strategic partnerships, are meticulously hand-built, using OEM-grade processes and absolute dedication to detail. They are all rolling pieces of art, futureproofed and capable of being enjoyed by new generations. It's this unique combination which continues to resonate with new buyers and collectors."

Hand-built in collaboration with specialist vehicle manufacturer Aria Group, based in Irvine, California, the Evergreen Commission boasts an Oak Green Metallic exterior with carbon-fiber body panels, roof, and RSR-style rear spoiler. Inside, the car is a celebration of sustainable luxury, featuring Bridge of Weir's low-carbon leather in a beautiful Harvest Tan finish. Recaro Pole Position seats and a Soft Napa leather-clad roll cage complete the interior's sleek, driver-focused design, eliminating the rear seats for an ultra-clean profile.

With a powerful 500bhp electric powertrain, the Evergreen Commission achieves a 0-60 mph time of just 3.7 seconds and a range of over 200 miles, thanks to its advanced 63kWh battery pack. The car also features a limited-slip differential and a TracTive suspension system, ensuring an electrifying yet smooth driving experience.

Designed and developed at its global headquarters in Oxfordshire, the latest 911 RSR-inspired model is just one of many redefined automotive icons in Everrati's leading, which includes electric versions of the Porsche 911 (964) Coupe, Targa, Cabriolet, G-Series based ST-inspired edition, Range Rover Classic, Land Rover Defender, Land Rover Series, GT40, and Mercedes-Benz W113 SL 'Pagoda'.

Everrati has also partnered with multiple brands. It has co-developed a fully electric version of Arcade Cars' new Sojourn luxury off-roader, a remastering of the legendary Mercedes-Benz G Class GE 230, which comes complete with an advanced Everrati electric powertrain, enabling it to bridge the gap between tradition and innovation, delivering a driving experience that is both timeless and effortlessly contemporary.

Everrati has also formed an alliance with Hemmels, the worldwide experts in the restoration and creation of the finest bespoke Mercedes-Benz SL vehicles. Blending its unique Neugeboren (Newborn) Restoration Process and globally renowned marque expertise with Everrati's state-of-the-art OEM-grade electric powertrain, the result is the very best zero-emission W113 SL in the world.

About Everrati™

Everrati™ was founded in 2019 by British entrepreneur Justin Lunny. A car enthusiast from an early age, he became increasingly conscious of the wider impact combustion engines have on the environment. Everrati was launched with the vision of restoring iconic models from an earlier era and redefining them to electric propulsion.

Everrati's model line-up consists of electric versions of the Porsche 911 (964) Coupe, Targa, Cabriolet in Pure, Signature, Gulf Signature and RSR-inspired Editions, ST-inspired G-Series, Land Rover Series IIA, Range Rover Classic, Land Rover Defender, GT40 in partnership with Superformance including officially licenced Gulf Edition and Mercedes-Benz W113 SL 'Pagoda'. Everrati™ designs, develops and builds its cars from a bespoke facility in Upper Heyford, Oxfordshire.

Everrati™ restores and modifies existing classic and iconic cars for its customers to enable them to be used and enjoyed in a low carbon world. Everrati™ does not manufacture vehicles. Everrati™ is not sponsored, associated, approved, endorsed, nor, in any way, affiliated with the manufacturers of the cars they restore. All brand names, logos and crests along with any other products mentioned are the trademarks of their respective holders. Any mention of trademarked names or other marks is for the purpose of reference only.

About Powered by Everrati

Delivered by a team of highly-skilled industry experts, utilising the latest Tier 1 components and technology, Powered by Everrati delivers the most appropriate powertrain solution to suit the requirement of the customer – from initial concept and feasibility study through to scaleable low volume production. Powered by Everrati supercedes Everrati Advanced Technologies, the previous brand name for Everrati's B2B division.
