

FOR IMMEDIATE RELEASE:

EVERRATI™ EXPANDS NORTH AMERICAN FOOTPRINT WITH FIRST CANADIAN DELIVERY

Everrati Showcases Elegance and Style in Motion with All-New Lighthouse Commission, a Thoughtfully Electrified 911 (964)

NEWPORT BEACH, CA (February 4, 2025) – Everrati, the global leader in redefining the world’s most iconic cars as sustainable luxury electric vehicles with cutting-edge zero-emission powertrains, recently announced the delivery of its first customer vehicle in Vancouver, British Columbia, marking the company’s expansion into Canada. Named “The Lighthouse Commission,” this one-of-a-kind zero emissions Porsche 911 (964) exemplifies Everrati’s commitment to blending iconic vehicle design with OEM-grade technologies to deliver an unsurpassed, sustainable driving experience.

Co-created with the vehicle’s owner, the Lighthouse Commission began life as a 1990 left-hand drive 911 964 Widebody Coupe. Featuring an entirely reengineered battery unit, the Lighthouse Commission delivers 500 horsepower and a 0-60 mph time of under 3.7 seconds with Everrati’s proprietary Performance Package. That same powertrain by Everrati also allows for around 200 miles of range, while regenerative braking further helps to improve battery life.

Key to delivering the required performance characteristics was optimizing the Lighthouse Commission’s overall weight. While maintaining the original 964’s rear-biased weight distribution, the Lighthouse Commission benefits from the implementation of new carbon fiber components throughout. Everrati’s engineering expertise ensures that the car not only retains the original driving experience of the internal combustion engine-powered 964 but enhances it with smooth, responsive power delivery. Everrati also incorporated an adaptive suspension system to further refine ride quality and handling, and included upgraded LED headlights and modern Porsche PCCM entertainment unit to ensure the modern driving conveniences were not sacrificed.

Throughout the co-creation process, Everrati’s team took great care to work hand in hand with the client to realize their vision, and remain respectful of what makes a 911 a 911, maintaining those cues, features, and analogue elements where appropriate. A reassuring Porsche door close, a standard-look rear light set (but still with modern LED upgrades), Fuchs-style wheels and a custom set of dials that look classic but still tell the authentic story of an EV drivetrain.

“The new Everrati Lighthouse is so much more than a visual masterpiece; this vehicle is designed for real-world use. The client challenged us to create a vehicle that captures the timeless, enduring appeal of the 964 while delivering reliability with daily, year-round driving in mind,” commented

Everrati Founder & CEO Justin Lunny. “The Lighthouse Commission’s transformation is a testament to Everrati’s ability to redefine icons for a new era. This commission was built as a reflection of our client’s passion, personality, and vision and we’re delighted to see it on the roads of an exciting new market for the company.”

The Lighthouse Commission name was inspired by a childhood vacation location that the client frequently visited with their family. Holding a deeply special meaning for the owner, Everrati worked closely with the client to ensure the Lighthouse Commission paid homage to their many visits to this intrinsically important place, focusing not only on performance characteristics, but also subtle touches with a distinctive Nardo Grey color and interior finishes. This vehicle is designed to create an entirely new set of family memories at the location, perfectly showcasing Everrati’s innate ability to transform a classic car for a new generation of sustainability-focused drivers, while making it uniquely personal to each client.

Everrati has recently introduced Carte Blanche, a bespoke offering designed to help clients create their dream EV from a truly blank sheet of paper. Spearheaded by former Chief Designer of Colour and Materials, of Aston Martin, this programme brings over 20 years of expertise in colour, material, and finish design to every commission. Everrati plan to publicly launch this exciting offering during Q1, offering discerning clients the opportunity to collaborate with Everrati’s experts to craft a one-of-a-kind electric masterpiece, tailored to their exact vision.

Everrati is a UK and US-based expert team of engineering and design specialists with extensive backgrounds working with the finest luxury automotive OEMs including Mercedes-Benz, McLaren and Porsche.

About Everrati™

Everrati™ was founded in 2019 by British entrepreneur Justin Lunny. A car enthusiast from an early age, he became increasingly conscious of the wider impact combustion engines have on the environment. Everrati was launched with the vision of restoring iconic models from an earlier era and redefining them to electric propulsion. Everrati’s model line-up consists of electric versions of the Porsche 911 (964) Coupe, Targa, Cabriolet in Pure, Signature, Gulf Signature and RSR-inspired Editions, ST-inspired G-Series, Land Rover Series IIA, Range Rover Classic, Land Rover Defender, GT40 in partnership with Superformance including officially licensed Gulf Edition and Mercedes-

Benz W113 SL 'Pagoda'. Evertati™ designs, develops and builds its cars from a bespoke facility in Upper Heyford, Oxfordshire.

Evertati™ restores and modifies existing classic and iconic cars for its customers to enable them to be used and enjoyed in a low carbon world. Evertati™ does not manufacture vehicles. Evertati™ is not sponsored, associated, approved, endorsed, nor, in any way, affiliated with the manufacturers of the cars they restore.

All brand names, logos and crests along with any other products mentioned are the trademarks of their respective holders. Any mention of trademarked names or other marks is for the purpose of reference only.

About Powered by Evertati

Delivered by a team of highly-skilled industry experts, utilizing the latest Tier 1 components and technology, Powered by Evertati delivers the most appropriate powertrain solution to suit the requirement of the customer – from initial concept and feasibility study through to scalable low volume production. Powered by Evertati supersedes Evertati Advanced Technologies, the previous brand name for Evertati's B2B division.
